

## **Precision™ Balusters & Connectors - Limited Lifetime Warranty**

All Precision™ balusters are warranted for the original purchaser against chipping, peeling and cracking. All Precision™ connectors are warranted for the original purchaser against breaking. Warranty does NOT cover installation costs.

If a Precision™ baluster or connector product has failed, the original purchaser can simply return the product in question for free replacement to:

**ASC-USA**

**1 West Ave.**

**Suite 217**

**Larchmont NY 10538**

Returned balusters & connectors must be accompanied by proof of purchase (original receipt) and the bar code (UPC) located on the package. This is needed as proof that the product was made by Precision™. Upon receipt of these items, Precision™ will immediately ship to the original purchaser replacement products free of charge.

NEVER CUT the baluster as this removes the protective coating and voids the warranty. If cutting is still desired, use multiple coats of rustproof paint to cover any exposed steel.

When tubular balusters are used with Cedar or Redwood Decking or Railing, stains can occur if the balusters and connectors are not properly installed. To prevent these stains we recommend to use an adhesive sealant at both ends of the tube at the connectors to prevent water from getting inside the baluster. Water going thru the baluster causes stains on Cedar and Redwood.

END.
